

## Future opportunity

## Process Mechanic for Plastic- and Rubber technologies

### The Job

The process mechanic will be needed everywhere plastics and plastic products are developed, manufactured, tried and tested.

### Job Description

State-of-the-art technology and production facilities, new plastics and demands for high quality inform the profile of the process mechanic

### Requirements

Good secondary-school leaving qualification or intermediate-school and sound knowledge in mathematics, physics and chemistry

### Apprenticeship with Stettler

With Stettler you will be trained to be a sought-after specialist in the industrial manufacturing of plastic. The professional activity is diverse and includes the servicing of modern facilities, maintenance tasks, quality control and communication with IT-Systems.

### Duration

Three years (**shortening to 2 1/2 years possible**)

### Vocational School

Blockschule in Rehau with accommodation in the dormitory [www.schuelerwohnheim-rehau.de](http://www.schuelerwohnheim-rehau.de)

### Apprenticeship Start

September

### Further Education

Plastic-Meister, plastic-technician, studies for diploma in engineering

### How to apply

Cover letter: Please specify the above-mentioned position and motivation for applying. In addition, please include your CV with a current photo and your final year's marks.

### Applications

by email or post to instructor, Claus Thaler
